DETAILED ACTION

Response to Amendment

Applicant's amendment of 3/15/2004 has been received, reviewed, and entered. Applicant amended claims 1 and 6, cancelled claims 2, 3, 7-10, and submitted an amendment to the specification. Claims 1 and 6 are pending. Applicant's arguments to the rejections presented in the Office Action of 12/10/2003 are persuasive. Accordingly, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hankin (U.S. 4,481,681) in view of Lo (U.S. 6,493,880). Hankin '681 discloses the invention substantially as claimed. Hankin teaches a cap 1, which could be worn for baseball, with a tubular and absorbent sweatband, comprising a crown main body having a plurality of panels as shown in Figure 1, and a visor portion secured to a forward portion of the peripheral edge of the crown main body and extending outwardly therefrom. The sweatband is sewn along the lower peripheral edge of the crown main body, also shown in Figure 1 and includes a tubular channel 35. Column 3, lines 3-5 recite that the channel may be formed by stitching opposite longitudinal edges of the sweatband together. This configuration would result in substantially parallel lines

Application/Control Number: 10/099,989

Art Unit: 3765

extending along and adjacent respective longitudinal edges of the tubular channel. Accordingly, the parallel lines could be used, if desired, to provide a guideline for attaching the sweatband to the crown main body. However, Hankin does not teach that the sweatband is made of a spun thread material having quick perspiration absorbency. Lo '880 teaches a baseball-style cap 10 with a sweatband 25 formed from a woven stretchable yarn (defined as spun thread in Applicant's specification) providing the sweatband with the ability to absorb sweat. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to form the tubular sweatband of Hankin from a spun thread material having quick perspiration absorbency as taught by Lo, because this material is well known for its superior absorption qualities.

Response to Arguments

3. Applicant's arguments with respect to the 112, 1st paragraph rejection are noted and in view of the amendment to the specification, this rejection has been withdrawn.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3765

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications should be directed to Primary Examiner Katherine Moran at (703) 305-0452. The examiner can be reached on Monday-Thursday from 8:30 am to 6:00 pm, and alternating Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Calvert, may be reached at (703) 305-1025. The official and after final fax number for the organization where this application is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist at (703) 308-1148.
